

Digital Wireless
Microphone System

SpeechLine Digital Wireless

SENNHEISER

Dedicated to speech

SpeechLine Digital Wireless is the world's first microphone series exclusively dedicated to speech. It is dedicated to speech because every feature and element has been optimized for best speech intelligibility and easiest handling during presentations, lectures or meetings. If you want to get your message across in a presentation, you cannot rely on a limited system. You need to have full bandwidth and full audio quality. As a professional tool, SpeechLine Digital Wireless comes with 20 to 20.000 Hz Audio Frequency Range and 24 Bit / 48 kHz Audio Sampling Rate.

All capsules of the SpeechLine Digital Wireless microphone series provide best speech intelligibility and are optimized for speech applications. Besides the best capsules for speech, SpeechLine Digital Wireless also comes with the best algorithms for speech. So, you don't have to set any sensitivity level or audio level

anymore. The Automatic Level Management makes sure that a signal is always in the right range. Besides that, you can choose from sound profiles such as male voice and female voice that bring sound to a higher level even if no sound technician is on site to improve the audio.

“Dedicated to speech” means also providing maximized usability and full remote control even in largest set-ups. With the revolutionary Sennheiser Control Cockpit software, all network enabled devices can be conveniently remote controlled even in campus-wide installations. With its Multi-Room Mode that allows the adjustment of transmission power to every size of room, SpeechLine Digital Wireless ensures best scalability. To provide full integrability for state-of-the-art installations, the SpeechLine Digital Wireless system is perfectly compatible with Dante™ and third party control options.

SpeechLine Digital Wireless

Enjoy easiest handling,
easiest remote control and
future-proof technology
with [SpeechLine Digital
Wireless](#) microphones –
focus on the content, not
the technology.

Designed for corporations ...

In our globalized business world with its increased importance of remote working and flexible open plan offices, modern workplaces call for state-of-the-art audio solutions. High sound quality is moving to the heart of every business. Reliable and flexible microphone solutions for presentation and meeting rooms that allow intuitive, fuss-free set-up and easy and reliable operation are essential for professional communication that ensures maximized efficiency.

... and educational applications.

SpeechLine Digital Wireless meets the real-life requirements of universities, schools and colleges with reliable, future-proof solutions. All products keep things trouble-free in the lecture room and are to 100% focused on seamless integration and ease of operation. SpeechLine Digital Wireless is widely scalable and answers best all needs of your everyday working and lecturing environment – from small room setups to huge campus-wide installations.

Highest reliability

SpeechLine Digital Wireless performs with greatest reliability thanks to advanced system automatics and full remote control.

Advanced System Automatics

Sennheiser Control Cockpit Software

The revolutionary new tool for easy handling, control and maintenance of the entire SpeechLine Digital Wireless system. It provides a global overview of all network enabled devices and their status information and makes setting adjustments very easy.

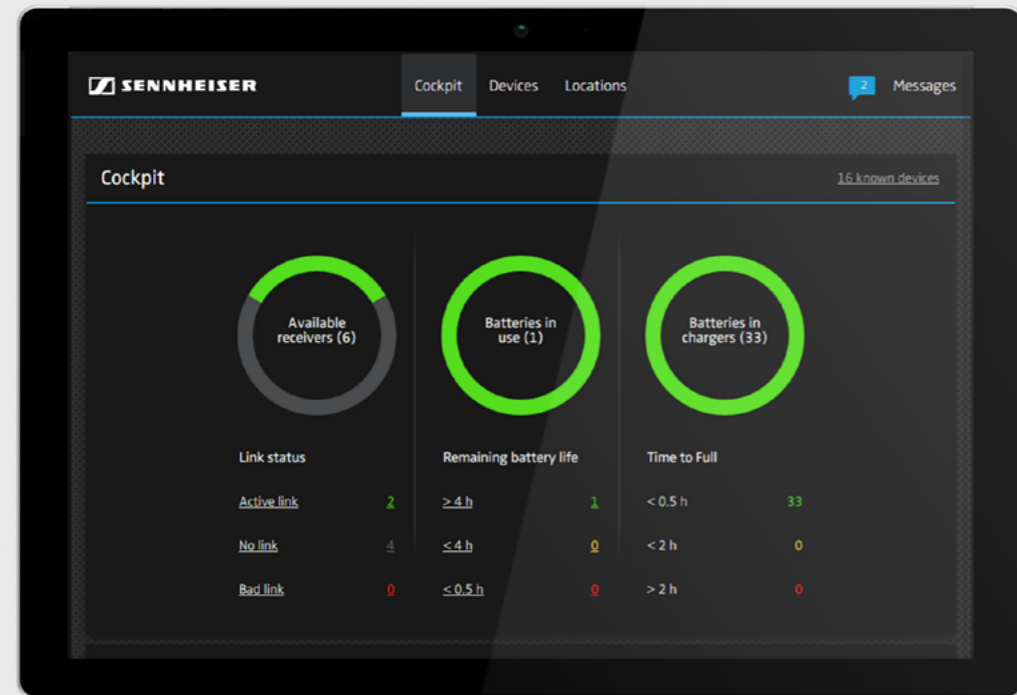

Automatic Frequency Management

For easiest set-up, Automatic Frequency Management performs an on-site real-time scan on startup to find free frequencies.

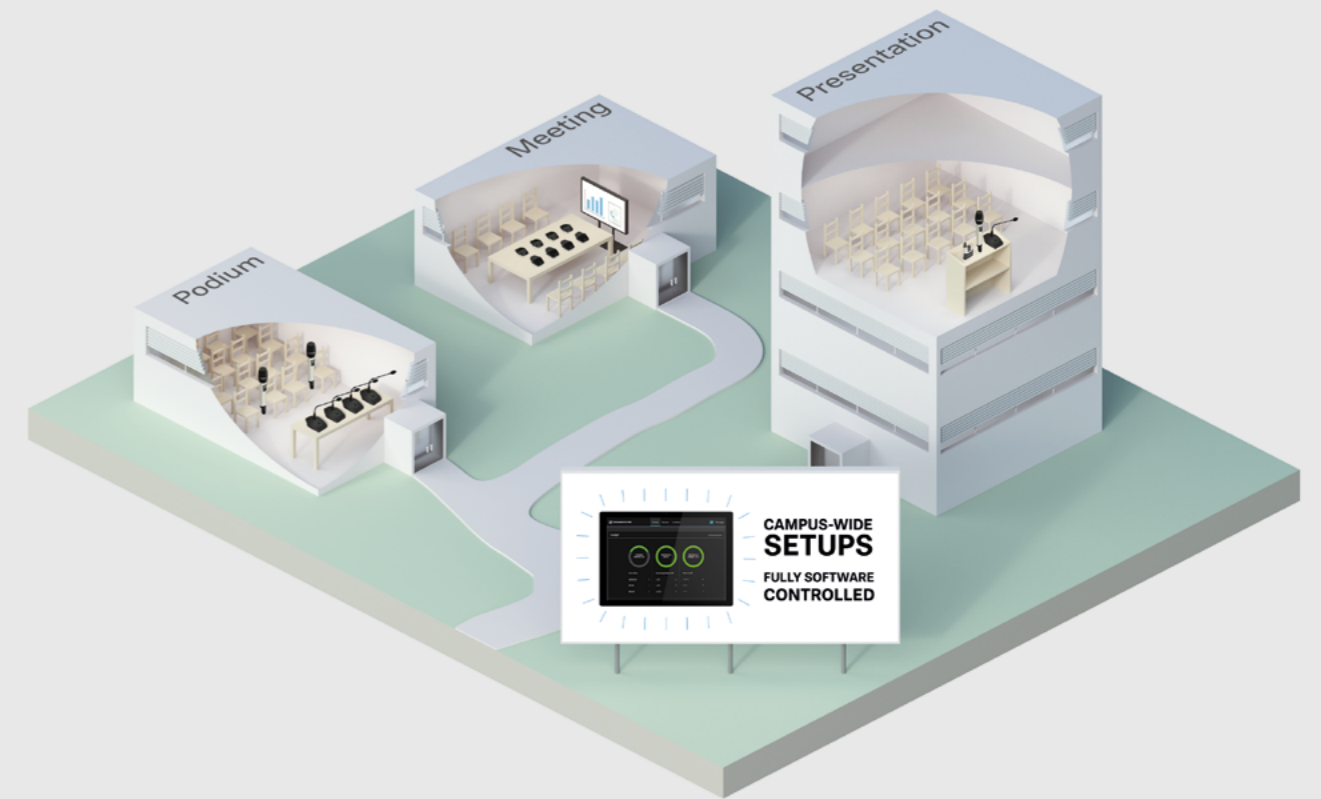

Automatic Interference Management

During operation, Automatic Interference Management changes seamlessly to a free channel in case of frequency disturbances.

Sennheiser Control Cockpit Software

The Sennheiser Control Cockpit Software is the central tool for easy handling, complete control and efficient maintenance of the entire SpeechLine Digital Wireless system. It provides a dashboard overview of all network-enabled SpeechLine Digital Wireless devices, shows status information at a glance and allows setting adjustments for one or multiple devices at the same time. In room overview, location and status of any specific device can be determined easily.

Campus-wide setups

The Sennheiser Control Cockpit Software is accessible everywhere in the intranet via web browser across all platforms. Managing huge set-ups with multiple devices is reliably easy and extremely efficient.

The versatile SpeechLine Digital Wireless microphone range and the innovative Sennheiser Control Cockpit Software represent a complete and scalable solution that is a future-proof investment ideally suited for education.

Best scalability

from presentation rooms with two microphone links up to campus-wide installations with more than 2,000 links.

Multi-Room Mode – for every application size

No matter what size your installation is, SpeechLine Digital Wireless always guarantees the highest speech intelligibility with its Multi-Room Mode.

SpeechLine Digital Wireless uses the future-proof, license-free 1.9 GHz frequency range. In order to make the most of this frequency range, SpeechLine Digital Wireless features two operating modes. The Automatic Mode ensures the simplest startup and a reliable, maximum range for up to 20* simultaneously used links. In Multi-Room Mode, the transmission power is adjusted to the room size to allow a significantly larger number of links. These setting options make the system ideal for a wide variety of different project sizes.

*Depends on the locally approved version

Maximized flexibility

SpeechLine Digital Wireless offers a fully remote controlled microphone solution for every kind of application and speaker's preference.

Maximized flexibility and remote control

Experience the comfort of remote controlled flexibility with SpeechLine Digital Wireless. The stationary SL Rack Receiver DW is the easy-to-integrate core of the SpeechLine Digital Wireless system. Thanks to the bi-directional communication, all settings of all mobile transmitters can be adjusted from the receiver side.

Thanks to the easy-to-handle pairing process, transmitter and receiver are securely linked. Via network integration of the SL Rack Receiver DW, all settings and statuses of all transmitters are accessible via the Sennheiser Control Cockpit software.

Covers all needs for all speech applications

Presentation

For hands-free presentations, you can choose between wireless table stand, handheld or bodypack transmitter for use with lavalier or headmic – depending on the speaker's preferences.

Podium

For podium discussions, the wireless SL Tablestand 133-S and SL Tablestand 153-S can be placed just where they are needed. For panelists, they provide a good orientation. The SL Handhelds DW are easy to use microphones for questions and reactions from the audience with best speech intelligibility.

Meeting

For conference rooms, the unobtrusive SL Boundary 114-S DW ensures best speech intelligibility and ease-of-use for all meeting participants. Due to their wireless charging function, the highly flexible boundary microphones are ready for us literally all the time. They provide best speech intelligibility for telephone conferences, for instance in combination with Sennheiser TeamConnect.

Integrates perfectly

SpeechLine Digital Wireless stands for seamless integrability due to its compatibility with Dante™, third party control options and multiple antenna solutions.

Dante™

Dante™ Interface

The SL DI 4 XLR Dante™ interface easily adds wireless microphone receivers or mic/line inputs to a Dante™ system. The small form factor of the SL DI 4 XLR allows it to be mounted almost anywhere and to get close to audio sources to minimize interference-prone analog wiring.

Antenna Solutions

The SpeechLine Digital Wireless antenna solutions allow for easy and unobtrusive installation of antennas just where they are needed. In combination with recommended passive combiners, the number of antenna wall mounts and cables can be minimized and the reception quality can be maximized.

CRESTRON

Third Party Control

For maximum remote controllability, all SpeechLine Digital Wireless devices are fully compatible and remote programmable with standard programming interfaces from Crestron.

Dante™

SpeechLine
Digital Wireless
supports Dante™

As one of the world's leading producers of audio technology, Sennheiser has aimed for decades to provide up-to-date audio solutions. Sennheiser's decision to make use of Dante™, the worldwide leading multi-channel audio over IP standard, is part of this ongoing effort to create future-proof products. The Australian based company Audinate created Dante™ as digital media networking technology with near-zero latency and synchronization that has been established as key audio networking solution preferred by leading AV manufacturers from all over the world.

Dante™ applications

For presentation

For the application presentation, the SL Hand-held DW, the SL Bodypack DW and the SL Tablestand 133-S / 153-S DW can all be connected to the SL DI 4 XLR four input Dante™ preamp. Just connect the microphone of your choice via the SL Rack Receiver DW to the four mic inputs of the SL DI 4 XLR that transfers the audio signal to your Dante™ network over a single RJ45 audio cable.

For meetings

For the application meeting, you can connect four SL Boundary 114-S DW microphones via the SL Rack Receiver DW to the four mic inputs of the SL DI 4 XLR that transfers the audio signal to your Dante™ network over a single RJ45 audio cable.

Benefits

Automatic Frequency Management

Automatic Interference Management

Software Based Status Monitoring

Multi-Room Mode

Dante™ Interface

256-BIT

Advanced 256-bit AES Encryption

Automatic Audio Level Management

Convenient Recharging

UP TO 20

Multichannel Operation

Optimum Speech Intelligibility

License-Free Operation

Future-proof 1.9 GHz

References

Understanding our customers needs.

Royal College of Physicians, London

The Royal College of Physicians (RCP), located in Regent's Park London, was the first professional body to install Sennheiser's new SpeechLine Digital Wireless microphone system. A total of 34 channels were purchased to replace the existing radio microphone system and to increase the number of available channels.

University of Edinburgh, Edinburgh

The University of Edinburgh is currently replacing its analogue Sennheiser microphones with Sennheiser's latest SpeechLine Digital Wireless microphone series. These Dedicated-to-Speech products are to be installed in 320 rooms.

Stephen Dishon, the university's AV officer, took this step because SpeechLine Digital Wireless products can solve several of his problems at a stroke: they get around frequency traffic jams, avoid interference with other microphones and the batteries last longer. Last but not least, Stephen Dishon thinks the robust design of the German-made digital microphones will be useful in the tough, everyday life at the University.

Sets, Components & Chargers

A complete
system

With its sophisticated portfolio of different microphone types, thoroughly compiled microphone sets and accessories like chargers, lavalier or headmics and antenna solutions, SpeechLine Digital Wireless offers a complete system of perfectly combinable advanced audio technology items.

Sets

SL Handheld Set

The SL Handheld Set includes the handheld transmitter, stationary receiver and everything to use or install. It comes with the MME 865 condenser capsule – so not just a capsule, but the best capsule for speech.

SL Headmic Set

The SL Headmic Set includes the SL Bodypack DW and comes with the extremely unobtrusive but robust, speech optimized SL Headmic 1. It weighs only 7g without the cable providing best sound performance.

SL Lavalier Set

The set includes the bodypack transmitter, stationary receiver and everything to use or install. It comes with the MKE 1 condenser lavalier microphone – so not just a lavalier mic, but the best and most unobtrusive one for great presentations with best speech clarity.

SL TS 133 GN Set DW

The SL TS 133 GN Set DW includes the SL Tablestand 133-S DW, the MEG 14-40 B gooseneck microphone and the SL Rack Receiver DW. It can either be charged wirelessly or via USB.

SL TS 153 GN-L Set DW

The wireless tablestand set SL TS 153 GN-L Set DW includes the SL Tablestand 153-DW, the MEG 14-40-L-II B gooseneck microphone and the SL Rack Receiver DW. The SL Tablestand 153-S DW is dedicated to speech. For a solid connection with the gooseneck microphone, an XLR 5 socket is featured.

SL Boundary Set DW

The SL Boundary Set DW includes the wireless SL Boundary 114-S DW microphone, the SL Rack Receiver DW and everything needed for use and installation. The microphone is optimized for voice transmission in conference rooms and offers highly flexible application possibilities due to the complete absence of cables.

Components

SL Rack Receiver DW

The stationary SL Rack Receiver DW is the easy-to-integrate core of the SpeechLine Digital Wireless system with network integration for remote monitoring and full control.

SL Handheld DW

The sleek but robust SL Handheld DW is optimized for speech in presentations or lectures where every word matters.

SL Bodypack DW

The robust SL Bodypack DW is compatible with all Sennheiser microphones such as SL Headmic 1 or MKE 1.

SL Headmic 1

The SL Headmic 1 is an extremely unobtrusive and comfortable-to-use headworn microphone. It features the proven omni-directional MKE 1 microphone capsule. The adjustable neck band makes its use convenient for everyone. The extremely lightweight (7 g) but robust metal frame makes long-term usage most convenient.

MKE 1

Sennheiser's smallest professional clip-on mic. Ideal for musicals, live shows, and broadcasting applications. Full, natural sound. High speech intelligibility. Very sweat-resistant due to protective membrane.

SL Tablestand 133-S

The wireless SL Tablestand 133-S DW is dedicated to speech and optimized for podium discussions and lectures.

SL Tablestand 153-S DW

The wireless SL Tablestand 153-S DW supports in addition with XLR 5 connectivity the MEG 14-40-L-II gooseneck microphone with integrated LED light ring.

SL Boundary 114-S DW

The wireless SL Boundary 114-S DW is optimized for voice transmission in conference rooms and offers high flexibility due to the complete absence of cables.

Charging stations

Charging solutions

Counterpart of the easy-to-handle SpeechLine Digital Wireless transmitters are our outstanding charging solutions that include a charging base featuring inductive, wireless charging and a network enabled charger that allows for remote control of the mobile transmitters while charging.

CHG 2

The CHG 2 two-bay charger makes battery management for two devices really easy. The mobile transmitters, while not in use, are charged in the two charging bays. The microphones are always ready to use.

CHG 4N

The CHG 4N is a network enabled charger featuring four individual charging bays. The flexible network interface provides IPv4 and IPv6 compatibility for seamless integration. All settings and status information can be monitored and remote controlled with the Sennheiser Control Cockpit Software.

CHG 2W

The CHG 2W is a wireless power transmitter. It provides convenient wireless charging. It is compatible with SL Tablestand 133-S DW, SL Tablestand 153-S DW and SL Boundary 114-S DW.

Batterypacks

BA 10

Rechargeable battery pack for the SpeechLine Digital Wireless SL Handheld DW transmitters.

BA 30

Rechargeable battery pack for the SpeechLine Digital Wireless SL Bodypack DW transmitters.

BA 40

Rechargeable battery pack for SpeechLine Digital Wireless SL Tablestand DW & SL Boundary DW transmitters.

Antennas & Rackmount

GA 4

A SpeechLine Digital Wireless compatible rack mount set.

AWM 2

The AWM 2 is an unobtrusive option to mount the antennas of the SL Rack Receiver DW remotely. It can either be wall mounted or set up on a tripod for ad hoc usage. It helps to achieve best RF performance with line-of-sight-transmission by getting above blocking or absorbing obstacles such as a big audience or metal racks.

CL 5, CL 10, CL 20

Antenna cable in 5, 10 and 20 m length. Compatible with AWM 2.

AWM 4

The AWM 4 supports to connect two antenna links directly. Instead of simply running the antenna cable through the AWM housing, the AWM 4 features four antenna connectors. You can directly connect the antenna cable on the outside so that set-up time is reduced to a minimum. The AWM 4 is also suitable for wall or tripod mounting.

CL 5 PP, CL 10 PP, CL 20 PP

Antenna cable in 5, 10 and 20 m length. Compatible with AWM 4.

Technical data

System

Technical data

AF frequency response	20 to 20,000 Hz
Dynamic range	> 120 dB (A)
THD (1 kHz)	typ. 0.1 %
Audio sampling	24 bit/48 kHz
Signal-to-noise ratio	> 90 dB (A)
Encryption	AES 256
RF frequency ranges	EU: 1,880 to 1,900 MHz USA: 1,920 to 1,930 MHz Brazil: 1,910 to 1,920 MHz Taiwan: 1,880 to 1,895 MHz Japan: 1,893 to 1,906 MHz
Modulation	GFSK with back channel
Transmission method	TDMA space diversity
Latency	19 ms
Temperature range*	relative air humidity max. 95 %
Operation:	-10 °C to +55 °C
Storage:	-20 °C to +70 °C

* The temperature range is influenced by the battery characteristics

SL Rack Receiver DW

Technical data

RF sensitivity	< -90 dBm
RF output power back channel	adaptive, up to 250 mW (country-specific)
Digital gain	adjustable in 6-dB steps
Mic/line level switch	-24 dB/0 dB
XLR, balanced	max. +18 dBu
RCA, unbalanced	max. +6 dBu
Audio effects	
Low cut	-3 dB at 120 Hz
Equalizer	7-band graphic equalizer with sound presets
Automatic gain control	AGC compression/expansion with automatic make-up gain function
Display	OLED
Network protocol	Media Control Protocol TCP/IP IPv4 (DHCP, Manual)/IPv6
Power supply	12 V DC
Current consumption	350 mA
AF connection sockets	XLR/2 x RCA
Antenna sockets	2 x Rev-SMA
Network socket	RJ45
DC socket for power supply	hollow jack
Dimensions	68 x 212 x 43 mm (6.61" x 8.35" x 1.69")
Weight	approx. 828 g (1.8 lbs)

SL Handheld DW

Technical data

RF output power	adaptive, up to 250 mW (country-specific)
AF frequency response	50 to 20,000 Hz
Input sensitivity	automatic sensitivity adjustment
Power supply	
Accupack	BA 10 (Li-Ion, 3.7 V)
Batteries	2 x AA size battery (1.5 V)
Operating time	
Accupack	typ. 15 h
Batteries	typ. 10 h
Display	LCD
Mute switch	available
Dimensions	
Diameter	40 mm (1.57")
Length	215 mm (8.46")
Weight (w/o accupack)	approx. 262 g (0.6 lbs) (incl. microphone head)

SL Bodypack DW

Technical data

RF output power	adaptive, up to 250 mW (country-specific)
AF frequency response	
Mic	50 to 20,000 Hz
Line	20 to 20,000 Hz
Max. input level	
Mic	2.2 V RMS
Line	3.3 V RMS
Line input impedance	1 M Ω
Input sensitivity	automatic sensitivity adjustment
Power supply	
Accupack	BA 30 (Li-Ion, 3.7 V)
Batteries	2 x AA size battery (1.5 V)
Operating time	
Accupack	typ. 15 h
Batteries	typ. 10 h
Display	LCD
AF connection socket	3.5 mm jack socket, lockable connector assignment:
Dimensions	100 x 65 x 24 mm (3.94" x 2.56" x 0.94")
Weight (w/o accupack)	approx. 88g (0.2 lbs)

SL Boundary 114-S DW

Technical data

RF output power	adaptive, up to 250 mW (country-specific)
AF frequency response	40 to 20,000 Hz
Pickup pattern	cardioid
Dynamic range	< 100 dB(A)
Microphone sensitivity	10 mV / PA
Power supply	BA 40 accupack (Li Ion 3.6 V)
Operating time	typ. 13 h
Temperature range	
Operation	10 °C to 45 °C (50 °F to 113 °F)
Storage	-20 °C to 70 °C (-4 °F to 158 °F)
Dimensions	114 x 85.3 x 30.8 mm (4.49" x 3.36" x 1.21")
Weight (w/o accupack)	approx. 208 g (0.45 lbs)

SL Tablestand 133-S / 153-S DW

Technical data

Microphone connector	XLR-3F / XLR-5F
AF frequency response	75 to 20,000 Hz
Max. input level	1.7 V RMS
Input impedance	30 k Ω
Microphone sensitivity	10 mV / PA
Power supply	BA 40 accupack (Li Ion 3.6 V)
Operating time	typ. 12 h
Operating temperature	-10 °C to 55 °C (14 °F to 131 °F)
Relative humidity	max. 95 %
Dimensions	166.7 x 120.2 x 47.9 mm (65.63" x 47.32" x 18.86")
Weight (w/o accupack)	approx. 650 g (1.43 lbs)

CHG 2

Technical data

Input voltage	12 V
Input current	max. 1100 mA
DC connection	
Charging voltage	5 V
Charging time for full charge at 20 °C	100 % = approx. 160 min = green
Temperature range	
Operation	0 °C to 45 °C (32 °F to 113 °F)
Storage	-20 °C to 70 °C (-4 °F to 158 °F)
Relative air humidity, non-condensing	Operation: 25 % to 95 % Storage: 5 % to 95 %
IP protection class according to IEC/EN 60529	IP2X
Dimensions	175 x 135 x 93 mm (6.89" x 5.31" x 3.66")
Weight	approx. 375 g (0.83 lbs) (without power supply unit)

CHG 4N

Technical data

Input voltage	12 V
Current consumption	2.5 A
Network socket	RJ 45
Network protocol	Media Control Protocol IPv4 (DHCP, manual) / IPv6
Charging bays	4
Charging voltage per bay	5 V
Charging current per bay	1 A
Charging status indicator	4 LEDs per bay (red, yellow, green, green)
Charging time for full charge	
SL Handheld DW	2 h
SL Bodypack DW	2 h
Operating temperature	0 °C to 45 °C (32 °F to 113 °F)
IP protection class according to IEC/EN 60529	IP2X
Dimensions	270 x 100 x 102 mm (10.6" x 3.9" x 4")
Weight	approx. 1100 g (2.23 lbs)

CHG 2W

Technical data

Input voltage	12 V
Input current	1.67 A
DC connection	
Charging voltage	5 V
Charging current	max. 1 A
Compatible devices	SL Boundary 114-S DW SL Tablestand 133-S DW SL Tablestand 153-S DW
Charging time for full charge	
SL Tablestand 133-S DW	on: 5 h / off: 3 h
SL Tablestand 153-S DW	on: 5.5 h / off: 3 h
Temperature range	
Operation	5 °C to 35 °C (41 °F to 95 °F)
Storage	-40 °C to 80 °C (-40 °F to 176 °F)
Dimensions	278 x 190 x 10 mm (10.9" x 7.5" x 0.4")
Weight	approx. 525 g (1.15 lbs)

SL DI 4 XLR

Technical data

Power consumption	500 mA
Powering	12V DC or 802.3af PoE
Phantom powering	P 48
THD, total harmonic distortion	typ. 0.1 %
Connection	
Audio In:	4x XLR3F
Ethernet / Dante™:	2x RJ 45 (1x with PoE)
PowerLink:	2x 2pole connector
Compatible Products	SL Rack Receiver DW ewG3 EM 300 MEB 114 MEG 14-40-L ... and others.
Dimensions	219 x 38 x 120 mm (8.63" x 1.50" x 4.74")
Weight	approx. 770 g (1.7 lbs)

	MME 865-1	MKE 1	SL Headmic 1
Microphone type		pre-polarized condenser microphone	
Sensitivity	1.6 mV/Pa	5 mV/Pa	5 mV/Pa
